DriverTech Completes Integration with TMW Systems

Combined technologies to improve fleet productivity and dispatch management

Salt Lake City, Utah, August 26, 2008 - DriverTech, designers of the transportation industry's only Windows® XP-embedded onboard computing system with three modes of communications today announced the availability of its interface with TMWSuite®, the market-leading enterprise transportation software (ETS) system from TMW Systems, Inc.

TMW ETS systems enable carriers to easily integrate vital, real-time data from every facet of operations into a single system to maximize operational efficiency, deliver superior customer service and ensure long-term profitability. DriverTech, known for its cost-effective and highly robust and intuitive onboard computing system, provides carriers with a wide range of application choices in an easy-to-integrate package.

"Combining North America's largest provider of enterprise management software designed specifically for the transportation services industry with what we consider to be the most advanced onboard communications system available on the market today opens up a huge growth path for both companies," states Mark Haslam, CEO DriverTech.

"DriverTech's XP Embedded platform can offer TMW customers a broad range of application options to suit their specific business requirements. DriverTech seems unique in the transportation industry in providing an open, powerful and mainstream operating system with a tethered, in-cab device well suited for driver messaging and a host of other driver services. Integrating vehicle location reports and interactive driver messaging with our TMWSuite product delivers powerful dispatch efficiencies" said Dave Mook, COO of TMW Systems.

About TMW Systems, Inc.

TMW Systems, Inc., is committed to delivering customer-driven solutions that help companies take better advantage of market opportunities, improve asset productivity and gain a better return on information. TMW's solutions are focused in the transportation services industries. TMW customers come from trucking, 3PL, private fleet, construction, municipal, retail repair and waste management. With offices in Cleveland, Ohio; Durham, N.C.; Indianapolis, Indiana; Dallas, Texas; and Vancouver, British Columbia; TMW currently serves more than 1,600 customers managing over 325,000 power units and maintaining more than 1.1 million assets worldwide, including North

America, Europe, China and Latin America. For more information, visit www.tmwsystems.com or call (800) 401-6682.

About DriverTech

Headquartered in Salt Lake City, Utah, DriverTech offers the transportation industry's most powerful onboard computing system utilizing three modes of communications. Using a robust Windows® XP-embedded platform, DriverTech's DT4000 allows for a wide range of application choices including; integrated in-vehicle scanning, electronic logs and video-based driver training. A true 'Tri-Mode' system, the DT4000 has the ability to connect satellite, cellular and Wi-Fi wireless networks simultaneously and then use a least-cost algorithm to automatically route data via the lowest cost communication option, making it the most cost-effective, bandwidth appropriate, content delivery system in the industry today. For more information, visit www.drivertech.com or call 866-331-8785.
